### Summary of Major Accomplishments

- Co-developed CMS console, which enables users to manager their websites without the need of prior programming knowledge without jeopardizing the professional integrity of their system. This console was successfully implemented by over 20 full-scale commercial websites.
- Developed large-scale intranet system for one of the nation's largest loan brokerages, automating lead distribution from third party vendors resulting in a significant reduction of turn-around time from 1 hour to 30 seconds.
- Developed and implemented a large-scale internal management suite which, while governing over 50 employees, resulted in the elimination of paper trail, the facilitation of communication between manager and employees, and permitted employees to work remotely.
- Developed and implemented complimentary communication systems for Lexus dealerships across the country. This system integrates with existing dealership software, and resulted in the doubling of internet sales response within 30 days of implementation.
- Tripled the number paid subscribers to Kyliptix Solutions Business suite from 800 accounts to 3000+ accounts between 2007 and 2009.
- Successfully launch TopGear website, one of the biggest British TV show within restricted time (<http://topgear.com>)
